Where Passion Meets Precision: Soccer Venues

Company History and Experience

Dant Clayton has been known as the leading designer and manufacturer of outdoor seating systems for the college, high school, and professional market for many years. Since 1979, Dant Clayton has taken a consultative approach to creating unique product solutions that exceed customer expectations. Driving nearly all advancements in the industry over the past 30 years, our product launches and entrance into new markets have allowed us to stand alone as the industry's innovative leader.

Throughout the years, Dant Clayton has collaborated with various client categories across the nation to develop creative and constructible solutions. Our partnerships span the gamut of top ten sports architects' offices, ENR's top specialty contractors, construction management firms, general contractors and a multitude of school systems and organizations. Together we have worked on numerous projects with individual price tags of \$100M or more to design, fabricate, and build thousands of seats across the country.

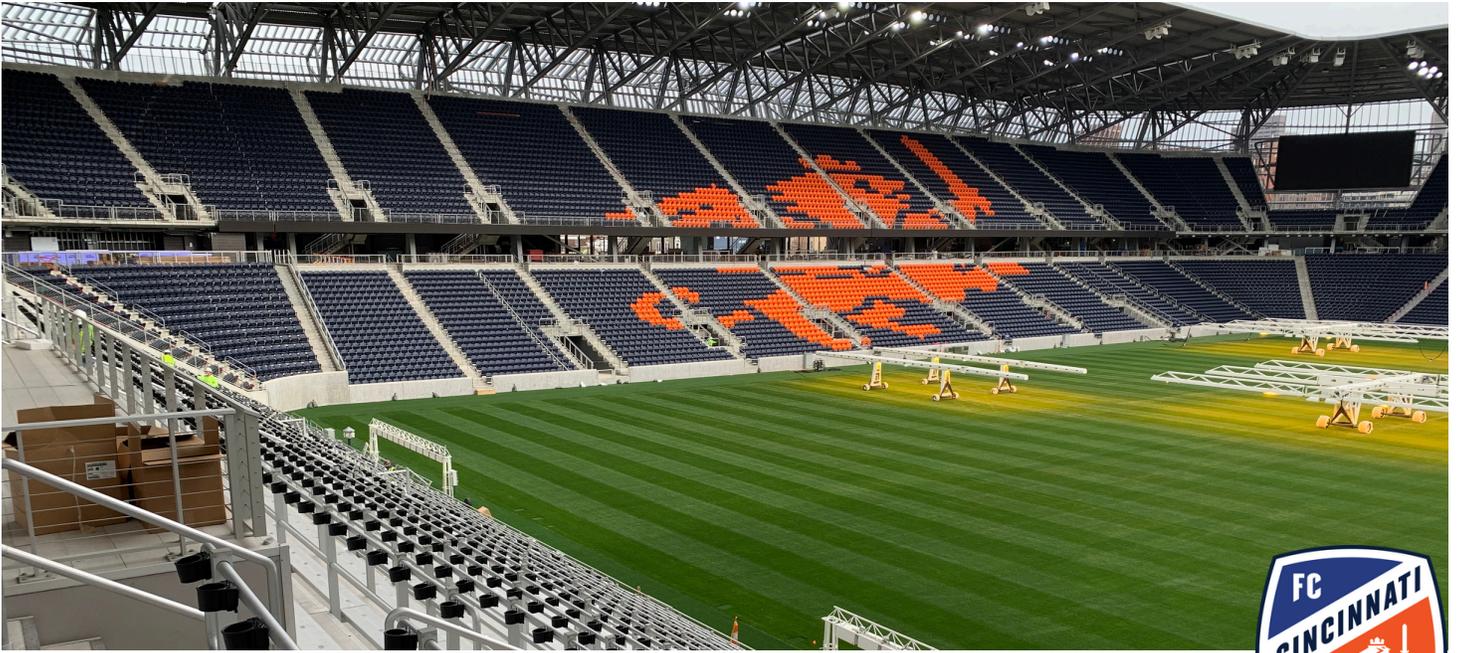

Offering the largest team of designers and engineers in the business, our Preconstruction Services Group provides customers with comprehensive design solutions and unmatched value-added consulting for our custom turnkey projects. This team is accustomed to working in complex environments with rigorous reporting criteria and stringent schedules. We have made our mark in the industry by constantly finding new ways to use our expertise to overcome facility design challenges within budget and schedule parameters.

Our wide range of capabilities extend beyond the design phase, as we offer full service technical support from the initial stages of planning through all phases of engineering, fabrication, and construction. With dedicated Project Management staff averaging over 10 years of experience with the company and an AISC, AWS, and CWB certified manufacturing campus of over 360,000 square feet, we possess the physical and intellectual infrastructure to successfully drive large scale, multi-phased, highly coordinated projects to completion.

Dant Clayton has outfitted several MLS and USL venues with optimized seating solutions. Our portfolio of soccer work includes Allianz Field – [Minnesota United FC](#), Shell Energy Stadium – [Houston Dynamo FC](#), BMO Field – [Toronto FC](#), Saputo Stadium – [CF Montreal](#), and TQL Stadium – [FC Cincinnati](#), Lynn Family Stadium – [Louisville City FC](#), Trinity Health Stadium – [Hartford Athletic](#), Patriots Point Soccer Complex - [Charleston Battery](#), WakeMed Soccer Park – [North Carolina Courage](#), former Sahlen's Stadium – [Rochester Rhinos](#), Centreville Bank Stadium – [Rhode Island FC](#), and CPKC Stadium in Kansas City, Missouri – [Kansas City Current](#) along with numerous collegiate and high school level soccer facilities. By understanding the unique fan experience requirements of this avid sport group, we have been able to work arm and arm with owners, contractors, and our highly skilled installation partners to bring these stadiums to life.

Integrated Thinking, Superior Outcomes

"In football [soccer], the worst blindness is only seeing the ball."
~ Nelson Falcão Rodrigues

At Dant Clayton, we design and build spectator seating that elevates the soccer experience. While our expertise is in the stands, we consider the full venue—flow, sightlines, design, and integration—to ensure every element supports the matchday atmosphere. By thinking beyond our scope, we deliver seating solutions that enhance fan energy, team pride, and the overall success of the stadium.

The Next Level

Our Process & Approach

From brilliant ideas to successful conclusions.

We begin with a sense of curiosity, which sparks a desire to explore and uncover new ideas. By stepping out of our comfort zones, we embrace the challenges that come with the pursuit of innovative thinking and foster a collaborative environment with diverse perspectives, which consistently delivers groundbreaking outcomes for our clients.

Consulting and Planning

We help strategize through feasibility studies, think through construction restraints, and make sure everything fits your project's schedule.

Design

Our team of experts works with your design team through the conceptual design phase and provides architectural support and planning.

Cost Analysis

We work within your project's budget and provide solutions tailored to your parameters.

Value Engineering

We provide options that break down cost efficiencies and optimize the revenue your project can generate, both now and into the future.

Engineering

Through our code analysis we ensure that our structural engineering is accurate every time.

Fabrication

Our certified and robust in-house facilities provide an easy solution to your project's fabrication needs.

Construction and Execution

Our team starts from the foundation and general site-work, to erection and assembly, and project manages our portion of the build.

Continued Service and Inspections

We don't leave projects behind. We stay involved through safety checks, code compliances, and assist with new modifications and upgrades.

The Next Level Delivered Your Way

Whatever delivery method your team needs, Dant Clayton is ready to collaborate.
