

Safety and Durability

- Non-climbable design.
- Complies to the 4"code rule and Consumer Product Safety Commission requirements.
- Factory-welded, panelized construction—no field welding required.
- Powder coated for superior durability and protection.

Optional Enhancements

- Clear anodized aluminum guardrails.
- Graphic inserts for team logos, corporate emblems and more.
- Mounting options include embedment in concrete, sleeve inserts, anchor bolted to concrete, or steel bolted to steel.

Specifications

Guardian Vertical Picket Rail Guardrail System

- Vertical guardrail support post shall be square structural steel tube HSS2x2x3/16 (min) using ASTM A500 Gr B material. Guardrail shall have structural support on each leg of the fencing at all turns.
- Infill panels shall bolt to the vertical post with top and bottom rails of 1 ½" structural steel channels with ½" structural steel balusters spaced at no more than 4" c/c.
